Fjord Interactive Marketing + Technology

Mr. Ben Molfetta

Co-Founder

Fjord Interactive Marketing + Technology: Toronto

500 King St W

Toronto, ON, M5V 1L7

Dear Ms. FILL IN,

Fjord's projects have played a key role in my development as a Interaction Designer. Projects such as your Metrolinx card system drew me to further hone my skills in usability testing as well as conducting primary research. In my own work, I delve deep into the research phase (where applicable) to better understand my audiences needs. I also bring a strong understanding and skill set in the rest of the design process, making it easy to creatively implement a clients vision

In my Bachelors Degree in Interaction Design at Sheridan I have developed my skills, further understanding the process needed to yield such positive and helpful interactions like with your groups innovations. My skills in the design process in not only UX and UI Design, but also in creative problem solving, have become very strong. I have many qualifications I can bring to your team including:

Skills in User Interface Design:

- Designed and coded websites and apps, following the design process

Usability testing Experience:

- Worked in a group constructing & facilitating user tests for KPDI
- Designed app taking feedback from users on competitors

Creative Problem Solving

- Facilitated for group creative problem solving sessions.
- Developed new concepts to tackling housing crisis for Innovation Hub

Skills User Experience Design:

- Collaborated with textile program to explore means of promoting relaxation
- Constructed robot that manipulate human empathy
- Researched, designed and developed a car enthusiast product

Your company has been driven to put the user at the center of your entire design process, keeping all of their interests at heart, while pushing yourselves to new creative boundaries. In all of my work I strive to do the same, to cater my pieces towards a demographic and engage them in every relevant way, but still provide a unique experience. I believe I would be a beneficial addition to your company and I look forward to being interviewed at your nearest convenience. Thank you for your consideration.

Sincerely

Barrett Flemons
